## ABOUT ME

I have been a wordpress web developer for more than 4 years. Starting my career in a web hosting company, I am not only able to create websites using wordpress but also able to operate and manage webhosting, VPS and Mail Hosting.

I am also able to migrate websites between servers.

In these 4 years I have created 50 website projects for individuals and also agencies or companies.

Me and My team also can work for web design , web using framework, content design and digital marketing.

# Own Software Developer Team with Cost-Effective Solutions

## INTALENTA.ID

### PROJECT

This is a company profile website and as a job application website in Intalenta company.

This is a group project and my role was to front end website development, I was responsible for making the appearance of the website in accordance with the design figma that has been agreed upon with the Klein, I also created the form system, using the form system to submit job applications to the wordpress dashboard and also navigation on this website, and I also configured the database of this website.

What I learned from this project include:

- Teamwork
- Converting styling from figma to wordpress
- Email settings
- Database configuration
- Custom elementor using CSS and javascript
- Form settings for applying for a job
